<b>Document Date</b>	<b>16/03/2021</b>

**NOTE: You are about to purchase a product that is not simple and may be difficult to understand**

### What is this Product?

**Type** An over-the-counter (OTC) foreign exchange derivative structure - Extendible Forward

**Description:** An Extendible Forward is a Structured Option which gives a guaranteed enhanced rate at which to trade for a given number of expiries. As with a normal forward contract, this structure protects against the risk that the Spot Exchange Rate will be less favourable than a nominated Foreign Exchange Rate (the Enhanced Rate) but will still obligate you to trade at that rate if the Spot Rate is more favourable. In order to achieve the Enhanced Rate, you agree that, if the Spot Rate is more favourable than the Enhanced Rate on the final Expiry Date of the guaranteed expiries, a further series of expiries with the same Protection and Obligation will kick in. If the spot rate is less favourable than the Enhanced Rate on the final of the guaranteed expiries, the structure will cease to exist at that time.

An Extendible forward is structured by entering into four concurrent options. In the first you buy a Put Option from WUIB which will give you the right, but no obligation to sell the Contracted notional sum to WUIB at the Enhanced Rate. In the second you sell a Call Option to WUIB, also at the Enhanced Rate, which obligates you to deal at the Enhanced Rate if the Spot Rate is more favourable at the Expiry Time. The third and fourth options are a further Put and Call with a later Expiry Date, this time subject to a knock in barrier which will be observed at the expiry of the first two. These options remain dormant and cannot be exercised unless the underlying Spot Rate trades at or beyond the barrier at the Knock In Rate on the Expiry Date of the first options. If the market is not trading at or beyond the Knock In rate on the Expiry date of the first options, the second options cease to exist.

Where applicable, a Window Barrier can only be triggered during a specified period of time, rather than throughout the life of the contract, while an At Expiry barrier can only be triggered at the expiry time on the expiry date

<b>Protection Rate</b>	<b>1,2016</b>	<b>Protected Amount</b>	<b>EUR 10000,</b>
		<b>Obligated Amount</b>	<b>EUR 10000,</b>
<b>Knock In Barrier</b>	<b>1,2016</b>	<b>Expiry</b>	<b>16/03/2022</b>

**Intended Retail Investor** This product is suitable for any corporate customer that has some prior experience of hedging currency risk, using either forwards or options, who wants to protect against downside risk without forgoing the ability to participate so some degree in favourable rate moves.

**Term** This Document assumes a term of 6 months, a typical duration for this structure type; however, the term of the contract will be agreed with you when entering into the deal. Once agreed, the buyer retains the right to request cancellation of the contract prior to expiry on demand, although this will incur a cost (see below). Western Union reserves the right to terminate the contract only in circumstances where the buyer is in breach of the contract terms, or becomes insolvent.

## What are the risks and what could I get in return?

Lower Risk

Higher Risk

The risk indicator assumes you keep the product for 12 months. The actual risk can vary significantly if you end your product at an early stage and you may get back less. You may not be able to end your product early. You may have to pay significant extra costs to end your product early.

The Summary Risk Indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as 7 out of 7, which is the highest risk class.** This rates the potential losses from future market performance at a very high level, and poor market conditions are very likely to impact the capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

In some circumstances you may be required to make payments to pay for losses. The total loss you may incur may significantly exceed the amount invested.

**If we are not able to pay you what is owed, you could incur significant losses**

Nominal Amount		EUR 10000,	
Scenarios		12 months (Recommended Holding Period)	
Stress Scenario	<b>What you might get back or pay after costs</b>	EUR -2938,529	
	Percentage return/loss over nominal amount	-29%	
Unfavourable Scenario	<b>What you might get back or pay after costs</b>	EUR -979,51	
	Percentage return/loss over nominal amount	-10%	
Moderate Scenario	<b>What you might get back or pay after costs</b>	EUR 432,057	
	Percentage return/loss over nominal amount	4%	
Favourable Scenario	<b>What you might get back or pay after costs</b>	EUR 1089,51	
	Percentage return/loss over nominal amount	11%	

The table shows the money you could get back or pay over the next 12 months (Recommended Holding Period), under different scenarios, assuming a nominal value of EUR 10000,.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios for other products.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this product varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product

This product cannot be easily ended. This means it is difficult to estimate how much you would get if you end before the end of the recommended holding period. You will either be unable to end early or you will have to pay high costs or make a large loss if you do so.

The figures shown include all the costs of the product itself and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What Happens If Western Union International Bank GmbH is unable to pay out?

As counterparty to your product you are relying upon WUIB's financial ability to fulfil its obligations to you upon maturity of the contract. This means that if WUIB is unable to pay out, you may not receive any amount at maturity of this contract. To aid in your assessment of this risk WUIB will provide you with a copy of its latest audited financial statements upon request. You may request a copy of our most recent financial statements by emailing us at [options@westernunion.com](mailto:options@westernunion.com).

**What are the costs?**

The Reduction In Yield (RIY) shows what impact the total costs you pay will have on the performance of the product. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for the recommended holding period. They include potential early exit penalties. The figures assume a nominal value of EUR 10000,. The figures are estimates and may change in the future.

**Costs over time**

Nominal Amount	EUR 10000,	If you end after the Recommended Holding Period
Total Costs		EUR 45,
Impact on Return (RIY)		<b>0,45%</b>

**Composition of Costs**

The table below shows:

- The impact on return per year of the different types of costs on the performance of the product at the end of the recommended holding period
- The meaning of the different cost categories

This table shows the impact on return over the recommended holding period

One-Off Costs	Entry Costs	0,45%	The Impact of the costs already included in the price.
	Exit Costs	n/a	The impact of the costs of exiting your product when it matures
Ongoing Costs	Portfolio Transaction Costs per year	n/a	The impact of costs of us buying and selling underlying investments for the product
	Other ongoing costs	n/a	The impact of costs that we take each year for managing your products and the costs presented in Section II

Entry Costs include a cost of credit which is determined by our assessment of your credit worthiness. This assessment will lead to an internal rating from A to D with the lowest credit charges for A rated customer. The above costs assume a rating of D.

**How long should I hold it and can I take my money out early?**

**Recommended holding period 12 months**

The recommended holding period is the duration of the OTC product as agreed in the individual contract. For this product, a holding period of 12 months is quite common and so has been used as the example; however, if you buy this option the duration should match your underlying cash flow requirements. There is no minimum holding period per se, but the product performs better when held for at least 12 months and the maximum is 24 months.

In general, the option should be held until the maturity date; however, it can be ended early at your request.

Depending on the market value of the product there may be a gain or loss to you at the point of ending the product.

**How can I complain?**

We have established procedures and policies to ensure that any complaint you may have is properly considered and appropriate measures are taken to address any issues. If you have a complaint, you can raise it with us by: (i) email at: [reclami@westernunion.com](mailto:reclami@westernunion.com); or (ii) telephone at 06 87410437; or (iii) by post to us at our Office Address : Western Union International Bank GmbH – sede italiana, via Virgilio Maroso, 50 - 00142 Roma, Italy.

Any complaint you make will be handled in accordance with our complaints handling procedures, copies of which are available from your Corporate Hedging Manager or on our website:
